

Amendments to the Specification:

Please replace paragraph [0040] with the following amended paragraph:

The face component 60 is generally composed of two pieces of metal; the face cup 74 and the striking face insert 72. The opening 45, which is formed in a front face 81 of the face cup 74, is configured for placement of the striking face insert 72 therein. The face cup 74 ~~component 60~~ has the return portion 77 ~~74~~ extending laterally rearward from the perimeter of the front face 81 ~~striking face insert 72~~.

Please replace the Abstract with the following amended Abstract:

ABSTRACT OF THE DISCLOSURE

A method for producing a golf club head (42) with a two-piece face component (60) and an aft-body (61) is disclosed herein. The face component (60) includes a formed or forged striking face insert (72) and a cast face cup (74) with a front face (81) and a return portion ~~(72)~~ (77) and separately forming the striking face insert (72). The striking face insert (72) is then pressed or swaged into an opening in the front face (81) of the cast face cup (74) while at the same time the cast face cup (74) is coined. The striking face insert (72) is then welded to the face cup (74) on the interior surface of the face component (60). The assembled face component (60) is then attached to the aft-body (61).
